CAPTURE THE FLAG

Capture the Flag is an information security competition that is an amalgamation of various challenges that applies concepts like Reverse engineering, Web Applications, Binary, Network, Cryptography, Forensics, etc. Each challenge holds a certain number of points based on its difficulty level. The idea behind these CTFs is to provide an individual practical knowledge of the different kind of attacks and issues in the real world.

CTF 2.0 is the latest edition of our training which provides the most advance modules that connect to the real infrastructures in the organizations and also assist students/professionals to prepare for global certification. This curriculum has been designed in such a manner that it accommodates both freshers and specialists and provides them with the necessary training w.r.t their skills.

PREREQUISITES

Prior to opting for this course, the candidate should be aware of advanced ethical hacking techniques, networking services, OWASP top 10, Linux /Windows basic and major commands, the Unix File System and the working of the Content Management System.

COURSE DURATION: 40 to 50 HOURS

Topics

Introduction

- Introduction to CTF and its importance in cyber world
- Introduction to Cyber Range
- Difference between CTF and Cyber Range
- CTF Course overview
- Types of CTF challenges platform
- Famous Channel Of CTF

Linux for Pentester

- Basics of Linux service
- Linux foremost commands
- Linux filesystems
- Linux Utility
- Installing & configuration of systems packages
- Deleting & removing systems package
- Reading Logs

Windows for Pentester

- Basics of Windows services & Registry
- Windows foremost commands
- Windows filesystems
- Windows Utility
- Working of dll, Python & C-programs
- Installing & configuration of systems packages
- Deleting & removing systems package
- Reading event Logs

Kali Linux

- Introduction to toolbox
- kali Linux services
- Searching, Installing, and Removing Tools
- Basic to Advanced Penetesting Commands
- Finding Files in kali

Enumeration

- Overview
- DNS Enumeration
- SMB Enumeration
- NFS Enumeration
- MSSQL Enumeration
- SMTP Enumeration
- SNMP Enumeration

Port Scanning with Nmap

- TCP Connect Scan
- Network Sweeping
- Stealth Scanning
- UDP Scanning
- Banner Grabbing
- OS Discovery
- NSE Scripts

Web Based Attack

- Web Application Enumeration
- SQL Injection
- File Inclusion
- Remote Code Execution
- Authentication Bypass
- Directory Brute Forcing
- Cross Site Scripting
- Directory Traversal

Passwords Attack

- Kali Linux Wordlists
- Creating Wordlists
- Retrive Password Hashes
- Hydra/Medussa/Ncrack
- Windows Credential Dumping

Active Directory Attack

- Overview
- AD & Domain Controler Lab Setup
- Active Directory Enumeration
- Active Directory Authentication
- Lateral Movement with NetExec
- NXC Ldap Enumeration

Msfvenom Windows Payloads

- EXE
- HTA
- Batch File
- PowerShell Modules
- MSI

Reverse Shell

- Rustcat
- netcat
- Pwncat
- Windows Conpty

File Transfers

- FTP
- Python HTTP Server
- Netcat
- CURL
- Wget
- NXC
- Python SMB Server
- Powershell File Transfer

Port Forwarding & Tunneling

- Overview & Lab Setup
- Port Forwarding
- SSH Tunnels
- Chisel
- Ligolo-NG

AD DACL Abuse

- Generic Write
- Force Change Password
- ADD Group Members
- Bloodhound
- Generic ALL

MS_SQL Exploitation

- Lab Setup
- Enumeration
- Enable xp_cmdshell
- Exploit xp_cmdshell
- Token Impersonate

Windows Privilege Escalation

- Manual Post Enumeration
- Kernel/Bypass UAC/Patch Levels
- Windows Services
- Backup Operator Group
- Token Impersonate
- Unquoted Service Path
- Scheduled task
- Automated Script

Bonus

- revshell.com
- HackTools Firefox Addon
- cyberchef
- asciitohex
- lolbin
- gtfobin
- Process Monitor
- Reporting Rewriting

Linux Privilege Escalation

- Understanding Linux Privileges
- Writable Script
- Crontab
- Kernel
- SUID
- Automated Script
- Sudoers
- Python Library Hijacking
- Disk Group Privileges

Finding Public Exploits

- Google Hacking Database
- Searchploit
- Exploit DB
- Securityfocus
- packetstormsecurity
- Mitre CVE

Capture the Flag Challenges

- Level -1: Easy
- Level-2: Medium
- Level-3: Intermediate
- Level-4: Hard
